

Dear Valued Customer,

The COVID-19 pandemic has had a far-reaching impact on the field of laboratory medicine. Due to disruptive supply chain issues, Grifols Laboratory Solutions Inc. (GLS) is in the unfortunate position of temporarily modifying our test menu effective March 25, 2021.

Test requests for ABO, Rh, Kell, Jk, and Duffy sequencing will be performed exclusively by next generation sequencing (NGS).

RH Full Gene Sequencing performed by next generation sequencing (NGS) will replace test orders for:

- RHD and RHCE Full Gene Sequencing
- Weak D 1,2,3
- Weak D 1,2,3,4
- RhD Zygosity

For all other individual gene sequencing tests please contact the laboratory.

Notification of updates and other changes to the menu will be provided on the Diagnostic website and in writing to our customers as the full menu is resumed.

We appreciate your understanding and patience.

Tiffany K Bratton, PhD
Laboratory Director

Guillermo Marco-Gardoqui
VP, Global Clinical Diagnostics
